Jonathan Cloyd

Evan Crumiller

Daniel Angebranndt -School

Board Member

Sonya Travis

Amanda Weigand – Americorps

Water Ambassador

Victoria Henderickson

Lucille R.S. Walter – Mercer

County Commissioner

Joe Mirabella

### GUEST VISITORS

1. Mercer County Commissioner Vice-President Lucille R.S. Walter speaking to the group to update us on Trenton-Mercer airport changes and the effects on the environment. Specifically speaking about the 600 trees that will be taken down to meet FAA requirements. The trees affected according to the FAA are in the 'runway protection zone' and are considered safety hazards. Behind houses on Sunset. However, only the trees will be removed; the brush and low ground brush will remain.
  - a. Where trees will be planted to compensate for all the tree loss, they will replant in triple tree deep settings. Commissioner Walter has stated that the Mercer County Board of County Commissioners had previously and unanimously approved a resolution supporting a "No Net Tree Loss" policy in Mercer County.
  - b. Ewing Administration has said that there is no place to replant these large numbers of replacement trees in Ewing. This is concerning since we have such a poor percentage of tree canopy in Ewing Township.
    - a. Ideas to foster tree replacement
      - i. Evaluate inventive tree replacement program in Hamilton that allowed residents to take one of the trees to be planted.
      - ii. Jennifer Keyes-Maloney has had talks with Mercer County that they would be willing to donate trees free to residents. This would allow more trees being planted and minimize the need for the township to find home for these trees.
      - iii. We also need to emphasize the importance on the tree replacements to be native species.

Ewing*

- c. Also, part of the discussion - the 'wetlands mitigation credits' that the work at the airport will be causing. – Commissioner Walter is working to make it a priority that the credits remain in Mercer County. However, NJDEP decides this. The consultants can ask but they do not have final say, DEP does.
- d. There are 'wetland credit banks' throughout New Jersey. Commissioner Walter spoke up at the Commissioner Meeting on Tuesday, January 25<sup>th</sup> during the discussion with the airport manager and the engineers and consultants involved in the airport construction. There are 2 of these 'mitigation credit banks' located in Mercer County – one is Hamilton-Robbinsville and the other is Lawrence-West Windsor-Princeton; Commissioner Walter made a point of emphasizing the importance of keeping the credits local, at least in Mercer County. The consultants agreed that they would make sure that the DEP is aware that it is preferred to remain in Mercer County.
- 2. Amanda Weigand from the Watershed discussed the "Health of the Streams Project."
  - a. Project- Environmental Cleanup
  - b. Suggestion to work with EHS students
  - c. Possible locations to consider Watson Park
  - d. Plan: Joanne to work with Amanda to bring this project to fruition

## MEETING AGENDA

- 3. Minutes – October meeting, December meeting and January annual retreat – all approved.
- 4. Officers for year of 2022
  - a. Secretary, Vice President and Chair. Caroline Steward has kindly volunteered to be Secretary
  - b. Evan has agreed to continue as VP
  - c. Joanne has agreed to continue as President, this will be her last year in this position
- 5. Swearing EGT of new/renewed members by Jennifer
  - a. New members include Donna Morgan, Priya Vimalassery, & Sonya Travis- Welcome
  - b. New student representative from Ewing High School- Daniel Angebrandt- Welcome

## ANNOUNCEMENTS/PROJECT UPDATES

- 6. At the request of the group from the last EGT meeting, Joanne signed us up to participate in The Watershed's "NJ Road Salt Impact Study".
  - a. Goal of Project: To find out if chloride levels spike after a road salting event, we need to collect data in both dry and wet weather. Take 3 measurements on a "wet" day, when rain, snow, or snowmelt may wash road salt into the water. Take 3 measurements on a "dry" day, when there hasn't been rain, snow, or snowmelt within 72 hours.
  - b. 2 stream locations were selected: Hollowbrook and the D&R Canal.
  - c. Volunteers for this project are Donna and Sonya backup volunteers include Caroline, Mark, and Evan
  - d. Test strips are backordered. Once available we need to visit each site 6 times before the end of March.
