EGT MEETING MINUTES

Wednesday, May 24th

Meeting Called to Order @7:06 pm at the Hollowbrook Community Center

Attendance: Joanne Mallowney, Heidi Furman, Lisa Feldman, Nick Benedetti, Karin Hollinger, Dan Bowen, Sharon McNellis-Kissell, Mark Wetherbee, Michael Licata, Linda Licata, John Bennett, Charlie Coriell, Jim ?, Karen Stewart-Sare

ANNOUNCEMENTS

- Green Team meetings will now be held in the Hollowbrook Gym instead of the Cafeteria.
- Last of collection for the Arbor Day tree planting due.

MINUTES

- Approve April minutes. See ewinggreenteam.org/meeting-minutes/ - Approved

GUESTS

- Linda and Mike Licata introduced themselves to the group- interested in learning more about gardening.
- Karen Holliger- introduced herself as a concerned citizen regarding the environment

ADVOCACY

- Joanne reviewed current Legislation described below:
- The Bipartisan Recovering America's Wildlife Act – an opportunity to make a historic environmental difference. The bipartisan Recovering America's Wildlife Act (S.1149) is before Congress again. In 2022, it passed the House 231-190, but didn't make it through the Senate due to disagreements about funding. As a rare bill with bipartisan support, it has a real possibility of passing both houses this year, but we need your help to ensure its passage. This transformative bill, widely considered the biggest piece of environmental legislation since the Endangered Species Act of 1973, aims to protect and restore both native wildlife and plants, with a particular focus on those of greatest conservation need, including endangered or threatened species. We need your help to make this bill pass into law by contacting your US Senators and Congressional Representative. Contact your Senators ([Cory Booker](#) and [Bob Menendez](#)) and urge them to support the Recovering America's Wildlife Act of 2022. Find other Senator's contact information

EWING GREEN TEAM

Ewing*

here: <https://www.senate.gov/senators/senators-contact.htm>. Suggested text from the New Jersey Native Plant Society is at the end of this agenda.

- The New Jersey Assembly is scheduled to vote **on Thursday, May 25**, on a bill to ban the sale of invasive species in our state. A NJ Senate vote should follow in the coming weeks. We have a real chance of banning the sale of invasive species in our state. Please ask your NJ Assembly and Senate representatives to vote YES on bill [S2186/A3677](#) which would regulate the sale of invasive plant species and establish an Invasive Species Council that will develop an invasive species management strategy.
- Request for Volunteers to keep an eye out for bills in the Legislature that we would be interested in supporting and to update us on them- _____

EGT OUTREACH – LISA, KAREN, AND HEIDI

- West Trenton Garden Club
 - Green team did presentation at their annual Flower Show and won an award
- National Night Out (NNO) 2023 - scheduled for August 1st- will be held at the ESCC

sustainablejersey.com/grants/
 - Dan ECC on creating a Youtube video on cleaning storm drain as possible use for grant.
 - Will also consider utilization of stormwater data base as possible grant topic.

Climate Action Plan

- Joanne presented below legislation to group.
 - Governor Murphy signed [Senate Bill No. 2607](#) on February 4, 2021 to require the integration of climate vulnerability assessments into future municipal master plan updates. Effective immediately, municipalities are required to include a climate change-related hazard vulnerability assessment in their land use plan elements to analyze current

EWING GREEN TEAM

*Promoting People, the Planet, and Prosperity in
Ewing*

and future threats associated with climate change related natural hazards, including increased temperatures, drought, flooding, hurricanes, and sea-level rise. This assessment also must include a build-out analysis of all future development in the municipality, as well as any threats and vulnerabilities associated with this development, and strategies to reduce the risks of climate change-related natural hazards. See <https://experience.arcgis.com/experience/9daab51c2f5542969d50437522e012c4/page/NJ-PLANNING-REQUIREMENTS/>

- Any changes to the Master Plan must now be accompanied by a Climate Action Plan.
- Will f/u with Township Planner to assure compliance
