Recommendations for a do not plant Invasive species list to add to the MLU.

Subcommittee reviewed ordinances. Also received NJEC best practices from Chatham and Eatontown, will review language for use in Ewing. Dave S doesn't anticipate issues with adopting the 70% native rule for new development. Plan to approach Council informally, give Dave info, he'll bring up with the remainder of the Council. We need to justify the request to increase natives to 70%, what are some good reasons for doing so?
